

Soundbank test program.

As the PRO.XS has no display or indicator, you can test the module using this mini program. Connect your PRO.XS to the PC/ computer/ tablet.

Switch on the PRO.XS module and open the Mini Module Sound Banks Test program

by selecting the application. Now test as follows:

1. select MB PRO.XS under Output Device.
2. press Snd Bank 1 Test and after a short time the blue Midi LED on the PRO.XS flashes.

Note: slow flashing = everything ok, very fast flashing = error in bank 1)

3. then press Refresh:
4. select the MB PRO.XS again under Output Device.
5. press Snd Bank 2 Test

Note: here it takes longer until the flash memory of the module is tested.

6. after a few minutes, the blue Midi LED should flash slowly again.

Very fast flashing of the Midi LED = error in sound bank 2

Close the program by pressing the red X at the top right.

If you recognize errors (very fast flashing of the blue LED), please contact us at info@mbmusic-pro.de. or give us a call: +49 6331 228010
